

BEING PREPARED NEVER FELT SO GOOD

**DON'T WAIT UNTIL
THE LAST MINUTE!!**

CHOOSE YOUR COMFORT LEVEL

Briggs & Stratton Home Generator Systems are the culmination of nearly a century of consumer power expertise, delivering the practical, innovative features and reliable performance that people expect from all Briggs & Stratton products.

IntelliGEN™ Series

**NEW High Efficiency
Backup Power only
from Briggs &
Stratton.**

Performs the job of larger generators at less than half the cost with one third the fuel consumption.

PEACE OF MIND

Whether you are home or away, power is automatically transferred to key circuits in your home during an outage, protecting your family while potentially saving you thousands of dollars in property damage.

CONVENIENCE

A permanent connection to your power supply via a power transfer switch automatically provides uninterrupted power to your home when the power goes out. Environmentally friendly low-cost fuels like Natural Gas or Liquid Propane provide a safe, continuous fuel supply, eliminating the need for extension cords or messy gas cans.

RELIABLE PERFORMANCE

At the heart of the generator is a high performance, fully featured Briggs & Stratton Vanguard™ V-Twin OHV engine. Designed for ultimate longevity and performance, the engine is powerful enough to work with homes that

Home Generator Systems

have low fuel pressure, eliminating the need for a costly additional pressure regulator.

UNOBTRUSIVE DESIGN

A sleek housing and small footprint make for subtle yet functional operation. Sound absorbing panels and an automotive muffler also keep sound to neighbor-friendly levels.

CONTINUOUS LOW-COST FUEL SUPPLY

A permanent hook-up to Natural Gas or Liquid Propane provides a safe, virtually continuous automatic fuel supply eliminating the inconvenient connection steps required with portable generators.

UNPARALLELED SUPPORT

Backed by one of the most established and comprehensive service networks in the industry, every Briggs & Stratton Home Generator System comes with expert installation and worldwide support.

EmPower™ Series

Standby power from a trusted name.

Continuous fuel supply (LP Vapor, Natural Gas — no need to store and pour gasoline!!)

Compact, stylish and ultra quiet.

Affordable 7kW - 15kW systems available.
