

INFOHUB™ WIRELESS MONITOR

MONITOR YOUR GENERATOR WHEREVER YOU GO

Infohub™ wireless monitoring tells you what you want to know about your generator – when you want to know it. Using your computer, tablet or smart phone, standby generator owners can instantly check their generator's system status from home or away.

Trust the power experts at Briggs & Stratton for complete peace of mind.

FEATURES AND BENEFITS

Monitor standby generator status, track utilization and be aware of any generator maintenance needs before your next power outage.

Choose what you want to know with adjustable standby generator notification settings. Receive email and text messages about your standby generator's performance.

Set-up standby generator repair by sending maintenance notifications directly to your servicing dealer.

Smart cellular-based system provides broad coverage and a reliable connection to your generator.

APPLICABLE MODELS

- ▶ All GE Generator System standby generators
- ▶ Any Briggs & Stratton standby generator as of August 2005

ADDITIONAL BENEFITS

Convenient mobile app allows homeowners to check-in and quickly learn generator status, generator service faults for repair and service schedule.

User-friendly custom web platform provides homeowners with in-depth information on their generator's status, utilization and service history.

Simple installation can be completed in less than 15 minutes.

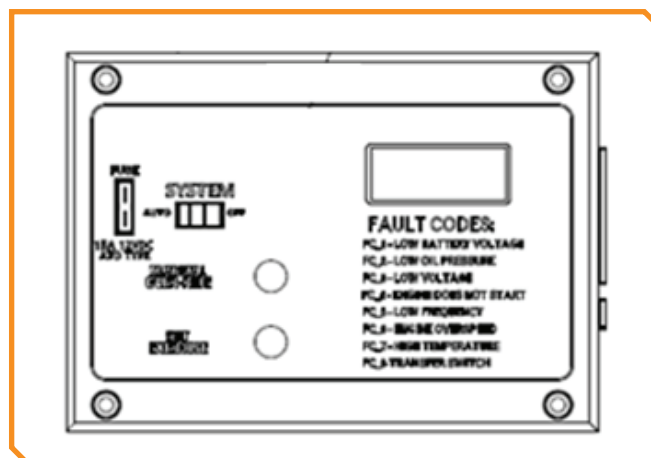

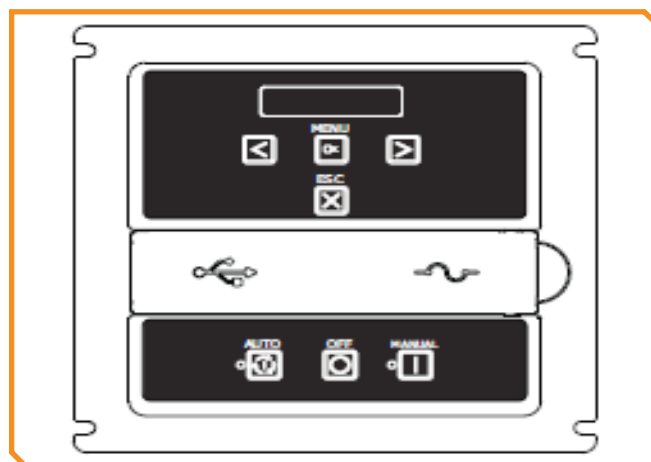

Proven infohub™ technology builds on already successful generator and commercial monitoring solutions.

Hands-off servicing with optional generator maintenance alerts going directly to the dealer for immediate repair and troubleshooting.

Affordable monitoring solution has low yearly or monthly subscription pricing.

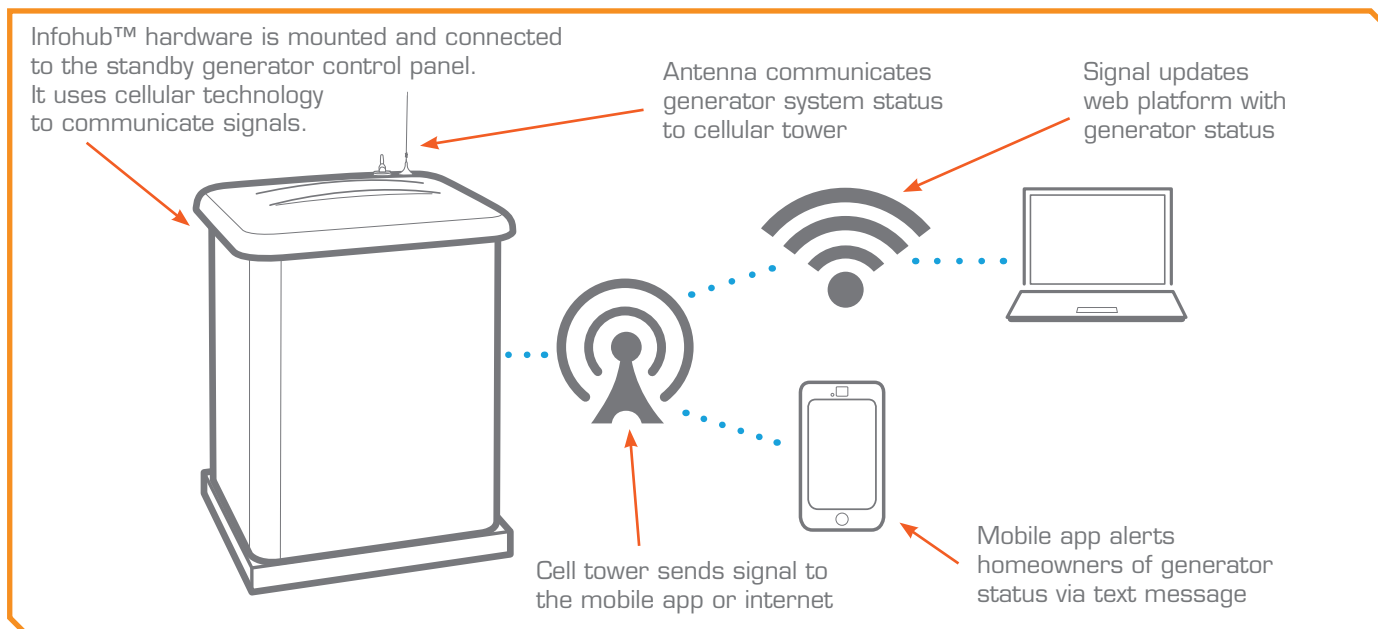

UL listed for use in Briggs & Stratton and GE Generator Systems

COMPATIBLE CONTROLLERS

ILLUSTRATED HOW IT WORKS

Infohub™ constantly monitors signals from your standby generator. When the generator's status changes, infohub™ instantly sends an alert to your email and phone.

CONSUMER FUNCTIONALITY

- ▶ Confirm generator status.
- ▶ Check generator battery voltage and engine hours.
- ▶ Set-up and adjust generator fault, status and maintenance reminder notifications.
- ▶ Track generator utilization and service history.
- ▶ View status and locations of multiple generators.
- ▶ Access service dealer contact information.
- ▶ Handle all account administration details including adding users for event notification, setting up the dealer as a fault contact and renewing the subscription.

DEALER FUNCTIONALITY

- ▶ Color coded alerts notifies your team at a glance that a customer's generator is having a problem or service is due soon.
- ▶ Use the web map feature to plan daily service calls based on system information regarding scheduled maintenance appointments, generator faults and each unit's location.
- ▶ Keep track of each customer's generator information including serial/model numbers.
- ▶ Know if your customer's generator is running or if their generator needs maintenance.
- ▶ Run utilization reports on customer's generator.
- ▶ Review service history on a customer's generator before going to the job.
- ▶ Keep notes on a customer's generator.
